20 - D											100	90	82	73	66							

Safe loads shown include dead load of 10 psf for untopped members and 15 psf for topped members. Remainder is live load. Long-time cambers include superimposed dead load but do not include live load.  
 D - DEPRESSED STRANDS    S - STRAIGHT STRANDS

**Bold type** — Capacity governed by stresses, others governed by flexural strength. Values below heavy line require release strengths higher than 3500 psi.
