

Structural Steel Project Profile

Industrial Building Frames

Coleson Cove Orimulsion Upgrade Coleson Cove, New Brunswick

Tonnage: 6000
Customer: NB Power
Owner: NB Power
Structural Engineer:
Coleson Power Group
Year: 2003

The 1050 MW Coleson Cove generating station underwent a major \$750 million refurbishment to allow it to burn Orimulsion fuel and install flue gas desulphurization (FGD) equipment supplied by Babcock & Wilcox. Ocean Steel's experience in the heavy industrial market helped secure the contract to detail, fabricate and erect 6000 tons of Structural and Miscellaneous steel required for the FGD Building, Limestone Storage and Grinding building, and Electrical building. Ocean Steel's experience and coordination was a significant factor in helping the Owner meet the critical milestone of an overhead crane installation for Babcock & Wilcox to install two absorber towers.

CORP. OFFICE & NB PLANT #1:
400 Chesley Drive • Saint John, NB
Canada • E2K 5L6
Phone: 506-632-2600
Fax: 506-632-7689
