

# Structural Steel Project Profile

## Industrial Building Frames

### *Oil Refinery Pipeway Supports Saint John, New Brunswick*

**Tonnage: 475**  
**Customer: Irving Oil Limited**  
**Owner: Irving Oil Limited**  
**Structural Engineer: Fluor**  
**Year: 2007**

This was a very complex project, from the original design stage and throughout detailing and field installation. It involved the replacement of existing steel supports for an in-service pipeway which was approximately 3600 feet long. Ocean's experienced in-house detailing department allowed excellent fit-up in the field. New structural steel was installed around the in-service piping while erecting from a narrow nearby roadway, thus planning and scheduling of deliveries were crucial to the project success.
