100 Technology Square

Located just minutes away from the Massachusetts Institute of Technology, 100 Technology Square has become the corner stone of the Technology Square complex in Cambridge, MA.

The 42,000 square feet of exterior wall on this eight story building was clad with 530 architectural precast concrete wall panels. The precast panels have a light limestone color with a light sandblast finish.

100 Technology square was one of seven buildings within this complex designed to bring technology companies together. Landscaping for the courtyard has given a park like setting to this outstanding building by planting over 100 mature trees creating a relaxing area for tenants and visitors.
