

Burlington Center

B u r l i n g t o n , M a s s a c h u s e t t s

*Focus on
The Building Envelope*

Architectural detailing and freedom of design.

Located in Burlington, Massachusetts, this building provides 130,000 sq. ft. of Class A office space.

Precast spandrel panels and column covers selectively placed in conjunction with a smooth skin glass and metal curtain wall express a feeling of open space and freedom of design in this office complex. The use of architectural detailing of the precast panels and using the texture of concrete to create crisp lines in the building envelope.

Polished granite corner accent blocks were also strategically incorporated in the precast element to add further elegance to the architectural design.

Project:

Burlington Center - Burlington, Massachusetts

Architects:

Elkus / Manfredi - Boston, Massachusetts

Structural Consultants:

McNamara / Salvia Inc. - Boston, Massachusetts
