Arsenal Parking garage is a six story parking structure located in Watertown, Mass. The structure was erected in just 55 days and provides parking for 1,100 cars. Strescon fabricated a total of 766 precast/prestressed concrete elements consisting of columns, spandrel panels and double tee floor slabs.

In order to replicate the look of the surrounding ex-military buildings, the exterior columns were formed to allow for a brick facade to be placed over the exterior face. A solid red precast band at the second and fifth floor levels complements the brick facade. The spandrel panels were cast with a recess pattern to create an appealing finish.

Project: **Arsenal Parking Garage - Watertown, Massachusetts**
Architects: **Bruner/Cott & Associates, Inc. - Cambridge, Massachusetts**
Structural Consultants: **Walker Parking Consultants - Boston, Massachusetts**
Construction Manager: **Alexandra / Columbia, Joint Venture - North Reading, Massachusetts**
