

CANADIAN TIRE

Halifax, Nova Scotia

Focus on
Insulated StresWall Systems

CANADIAN TIRE continues to expand and upgrade their stores across Atlantic Canada. This new store located within the Clayton Park Plaza, in Halifax was enclosed with buff colored Streswall, insulated, precast concrete panels.

The panels have a deep profile, vertical, rib on the exterior face and a smooth steel form finish on the interior, ready for painting.

The main entrance of the stores are framed with white sand blasted insulated precast concrete panels. Low maintenance, energy efficient and freedom of design made precast concrete an ideal choice for the CANADIAN TIRE retail stores.
