

Canadian Tire

Dartmouth, Nova Scotia

Focus on
Precast Concrete Solutions

Canadian Tire is located in the ever expanding Dartmouth Crossing, a large retail development being constructed at the intersection of highways 107, 111 and 108 and only a few minutes away from Burnside Business Park. It is the largest Canadian Tire ever built and with the used of insulated precast concrete wall panels as their exterior wall system we were able to erect in only 5 business days.

Altogether 53 insulated wall panels were used. There were 27-11" panels with reveals and 26-11" panels that were smooth. The exterior and interior panels were grey in colour and smooth in texture, with the exterior faces using reveals where required.

Design elements such as reveals allow the Architect to give the building character, and with the flexibility and quality control of precast wall panels they are able to achieve that.

Project: **Canadian Tire -Dartmouth, Nova Scotia**
Architects: **Davison Seamone Richard Adams Architects Inc.**
Halifax, Nova Scotia
Engineer: **Y&V Engineering Ltd - Markham, Ontario**
Construction Manager: **Marco Maritimes Ltd.**
Dartmouth, Nova Scotia
Precast Fabricator: **Strescon Limited - Bedford, Nova Scotia**
