

CarQuest Distribution Centre

Saint John, New Brunswick

When **CARQUEST Auto Parts** decided to build its distribution center in Saint John, NB, they wanted a cladding material that was durable, attractive, and readily available. With Strescon's plant less than 3 miles (5 km) from the site, the decision to use precast concrete wall panels was easily made.

The warehouse portion of the building used 29,000 sq.ft of 10 inch thick insulated wall panels and the office area used 11,700 sq.ft of 6 inch thick solid wall panels and column covers. All of the panels on this building were erected in just over two weeks.

The building was completed in 2003.

INDUSTRIAL PRECAST WALL PANELS
