

Casino Nova Scotia Parking Garage

Halifax, Nova Scotia

*Focus on
Precast Concrete Solutions*

Casino Nova Scotia parking garage was constructed with a precast / prestressed concrete building system using beams, columns, architectural spandrels, shearwalls and double tee floor slabs. The layout of the garage is an interwoven spiral ramp with one way traffic flow. The building is serviced with two precast concrete stair towers, including one elevator tower connected to the casino.

The designers used architectural details, colors and textures on the precast columns, spandrel panels and stair towers as part of the overall Casino Nova Scotia complex. To accomplish this, a buff colored pigmented sandblasted precast concrete was used through the exterior face of the garage and casino.

The finished, column free, seven level parking garage provides space for 570 cars.

Project: **Casino Nova Scotia - Halifax, Nova Scotia**
Architects: **Lydon Lynch Architects Limited - Halifax, Nova Scotia**
Structural Consultants: **BMR Structural Engineering
Halifax, Nova Scotia**
Construction Manager: **Lindsey Construction Ltd. - Halifax, Nova Scotia**
Precast Fabricator: **Strescon - Bedford, Nova Scotia**
