

# QE II Parkade

Halifax, Nova Scotia

Focus on  
Precast Concrete Solutions

PARKING GARAGES  
Structural Building Systems

**QE II Parkade** site work started in September on this new 550 car parkade and addition to the QE II Health Sciences Center which is scheduled to open in spring 2003 adding much needed parking at the Robie Street entrance.

This parking garage is designed with three bays wide, three levels and column free precast / prestressed concrete structure.

The layout will give patients, visitors and staff covered parking as well as easy access to the hospital. The building is serviced with three stair towers and a full service elevator to the main entrance of the hospital.

The architects have designed the garage to blend with the existing hospital at the same time be functional and pleasing to the eye.

To accomplish this the precast panels are detailed and tinted with an earth colored pigmented concrete to express the color of the main hospital. The use of open space, glass stairs, elevator lobby and entrances create a warm comfortable feeling for visitors and patients using the facility.

Project: **QE II Parkade**

**Queen Elizabeth II Health Sciences Center - Halifax, Nova Scotia**
