

Sobeys Head Office Addition

Stellarton, Nova Scotia

*Focus on
Precast Concrete Solutions*

A large business like Sobeys requires proper management, in a proper and professional head office. Precast concrete proved to be the best choice. The existing office preformed well over the years and still looked great but was too small to do the job. Strescon was given the task of matching the color, tone and style of the existing precast building. Due to great record keeping and quality control efforts, the match was perfect. The project gave limited disruption to the daily operations of the Sobeys staff while installing the 21,900 sq.ft of precast. The final product provided Sobeys with a building able to handle all of the management needs within one professional looking structure showing no signs that an addition had been made.

Old Sobeys's Office Building
