

South Shore Field House

Bridgewater, Nova Scotia

Indoor Sporting Facilities are very useful for various sporting events all year round. To promote a community commitment to live a healthier lifestyle the government invested money into the South Shore Field House in Bridgewater, a pre-engineered steel building that was completed in 2008. This facility has a synthetic turf field and is able to host such events as soccer, track-and-field, baseball, cheerleading, lacrosse, golf, archery and gymnastics.

Strescon Limited supplied Rikjak Projects 18,150 square feet (230 pieces) of 8” Strescore plank to be used for an intermediate running track and spectator surface in the facility. The contractor installed the Strescore themselves using a customized forklift with a spreader bar.

Project: **South Shore Field House - Bridgewater, NS**
Architects: **Rikjak Projects - Halifax, NS**
Engineer: **Rikjak Projects - Halifax, NS**
Construction Manager: **Rikjak Projects - Halifax, NS**
