

Summer Gardens Condominiums

Halifax, Nova Scotia

Focus on
The Building Envelope

Color, shape and texture add elegance to this 21 story condominium. Summer Gardens Condominiums was built in 1986. The warm golden color and texture of the precast concrete panels was achieved by the use of yellow aggregate and white cement. The architect used protruding bay windows and balconies to capture a 360° view of Halifax Harbor, Citadel Hill and Public Gardens.

Precast concrete panels are truly a building material for the imagination and inspiration of the builders and designers.
