Architects: **Jung / Brannen Associates** - Boston, MA
Engineer: **Lemessurier Consultants** - Cambridge, MA
Construction Manager: **ADP Marshall Inc.** - Rumford, RI

“Sandblasting” a cost effective way of adding detail. This 220,000 sq. ft. multi-tenant, Class A office building was completed by Strescon in 1998. The building envelope uses the texture, color, and detail, of the precast spandrel panels to contrast the smooth surface of the curtain wall to contrast the smooth surface of the curtain wall to visually divide the overall building mass.

The aggregates used for the color and texture of the panels were obtained from both Colorado, USA and Ottawa, Canada.

Most of the 500 pieces of precast panels used to clad this building were given three different colors of textures by using varying levels of sandblast finishes.
