

Home Depot

Halifax & Dartmouth, Nova Scotia

Focus on
Precast Concrete Solutions

Home Depot opens two stores in Nova Scotia. The use of insulated, architectural precast concrete panels for the walls provides a finished building envelope enclosure around the total exterior of the store in just a few weeks. This wall is a fully insulated hardwall with a plant fabricated finish on the exterior, and a smooth surface on the inside which was painted by the owner.

The walls and entrances are accented with an orange, horizontal, painted band to match the orange canopy roofing. Brown clay brick was used at both the garden center and around the main entrance to blend in with the existing buildings of the area.

The architect selected a blend of aggregates, cement, sand and a buff color pigment concrete mix which received a medium sandblast to achieve an eye catching golden color.

Project: Home Depot - Halifax / Dartmouth, Nova Scotia
Architects: Venchiarutti Gagliardi Architect Inc.
Markham Ontario

Kassner Goodspeed Architects Limited
Halifax, Nova Scotia

Structural Consultants: TSE Consultants Inc.
Toronto, Ontario
